

TRIACs, 6A

Snubberless, Logic Level and Standard

MAIN FEATURES

SYMBOL	VALUE	UNIT
$I_{T(RMS)}$	6	A
V_{DRM}/V_{RRM}	600 to 1000	V
$I_{GT(Q1)}$	5 to 50	mA

DESCRIPTION

The 6T triac series is suitable for general purpose AC switching. They can be used as an ON/OFF function in applications such as static relays, heating regulation, induction motor starting circuits... or for phase control operation in light dimmers, motor speed controllers,...

The snubberless and logic level versions are specially recommended for use on inductive loads, thanks to their high commutation performances.

By using an internal ceramic pad, the 6T series provides voltage insulated tab (rated at 2500VRMS) complying with UL standards (File ref. :E320098)
